StashMail For Novell GroupWise

## StashMail

### StashMail for Novell GroupWise Solution

#### System Requirements

- Existing or dedicated Microsoft Windows NT/Advanced Server with minimum 256 MB RAM, 100 MB free disk space
- IIS 5.0
- GroupWise Client
- One available serial port
- 100 MB space SQL Server 7 or 2000 Database

### Integrated Email Account

**Manage your account once** 2 way synchronized email. Read and delete emails on your handheld while you are on the road. When you return to your office your desktop email will already be updated.

**Efficiently send emails** Emails sent from StashMail come from your GroupWise account. A copy of the email is placed in your sent folder for future reference

### Extra Features

**Microsoft Word Attachment** When an email is received with a Microsoft Word attachment the first 4000 characters (approximately 2 pages) of text is read and then pasted into the body of your email.

**Multiple folder and GroupWise Filter Support** Keep up to date messages from your Mailbox and any of your folders on your handheld. Any filters you have defined on your GroupWise account will be applied to your messages before they are sent.

**Advanced Encryption Standard** Secure communication from your corporate email account to your handheld device using the newest encryption standard.
